

Cause And Effect

69 Chambers

Remember me I'm a question of time, the one you never
asked
Remember me it's been a while but I'm back with answers
at last

What goes up comes down
Crashes down to the ground
What goes up come down
Someday turned into now

[Chorus:]
A means to an end
An end to a means
It's cause and effect
I'm here to come clean
A means to an end
An end to a means
It's cause and effect
Gonna make you bleed

C'mon collect the bitter crop you have left for the
wind to suck
You can't expect your harvest to rot in the sun for
crows to pluck

[Repeat chorus]

What goes up comes down
Crashes down to the ground
It's cause and effect
Something that you can't reject
What goes up comes down
Crashes to the ground
