

I'm working hard to make it all happen
I want to get it all
I've collected all the stars in the sky
I'm at the point of no return
I need to make my choice
I'm caught between the dark and light

Did you ever reach for a shining star?

Will you return to me
Redeemer of all life
Embrace me now and take me home
Will you answer me
Redeemer of all life
Reach to us your nail scarred hand

I'm climbing higher up the ladder
I wanna see all the world
With open arms I greet the sun
I'm not afraid to fall anymore
I will raid the wings of this story
With open eyes I face all the glory

Do you always wait for it to fall in your hand?

Will you return to me
Redeemer of all life
Embrace me now and take me home
Will you answer me
Redeemer of all life
Reach to us your nail scarred hand

Why have you brought me to this place?
Why am I here if you're not with me?
Lost in this desert of despair

One time long ago you came to me
When I was lone and scared
You made me take a stand

Still I make mistakes
And give you the blame
There's nothing I could do,
That you don't already know

Will you return to me
Redeemer of all life
Embrace me now and take me home
Will you answer me
Redeemer of all life
Reach to us your nail-scarred hand
