

I've Won

88 Fingers Louie

I recall the time that changed my whole fucking life
Call it fate, call it what you want, but it happened to me
Some people go through life searching for this thing called love
Call it fate, call it what you want, but it happened to me

And I can't believe the way she makes me feel inside
When I'm around her, I just can't help but smile
She may be unsuspecting of this but I'll look at her and say all
of things I feel
She wants to know all the thing I feel, I'm gonna tell her how
I fell inside

I've won
I've won
I've won

She makes me laugh, she makes me cry
My love for her will never die
She makes me think, she makes me believe in myself
Now I can see my life is rectified

And I can't believe just how she changed my life
My outlook on life is leaning toward the positive
She means everything to me and I'll do anything to keep from losing her
Deep in my heart I can't lose her and I don't feel like such a
loser now

I've won
I've won
I've won
