Oooh, Oooh, ooh the way you do

You're heard this a thousand times before I'm in love with you You'll hear it at least a million more Baby that's the truth It's the small things that endear me every time that you are near me

The way you laugh at what I say The way you look at each new day The way your tears fall right on cue That's what I love about you Nobody else knows me by heart takes me where I can reach the stars Makes me believe in love The way you do

You've see me in the man that I can be and I'm thanking you You've given me all I'll ever need All I wanted, too I know how blessed I am girl, you are my best friend

The way you laugh at what I say The way you look at each new day The way your tears fall right on cue That's what I love about you Nobody else knows me by heart takes me where I can reach the stars Makes me believe in love The way you do

Oooh, Oooh, ooh the way you do (the way you do, oooh no no no oooh) ooh oooh ooh the way you do you've gotta listen baby

The way you laugh at what I say The way you look at each new day The way your tears fall right on cue That's what I love about you Nobody else knows me by heart takes me where I can reach the stars Makes me believe in love The way you do, the way you do, the way you do
