

## Solstice

### A Common Year

When the sun goes away we will hide  
In the warmth of a dark summer night  
In the face of what we are not ready to be  
We'll sing "No, it's not our time to go"

I tried to stay  
As long as I could  
But moments fade  
And we knew they would  
And for a night  
I kept everyone close enough to forget  
What the next day would bring

No, it's not our time to go
