

## Out in the Dark

A Global Threat

Seems like so many nights  
Get the 66 while dusk kills the light  
Go ahead and swill two in the back  
Looking down on a Cadillac  
Catch the headliners first note  
Have a drink on someone you know  
Stroke of midnight your friends turn a blur  
Life seems like shit,  
all you think of is her and...

I'm all out in the dark

The corner clock on the wall strikes four  
It's quarter of five when  
I fall through the door

I'm all out in the dark

Anything you want, or anything you need  
So go and sniff your way around  
Cause it's getting hard to see  
The smoke will never clear  
And once you're here you'll never leave  
And that pounding, spinning, twitching  
You should watch what you eat!

Looks like a blue sky tonight  
To twenty eyes it's a familiar sight  
Crawl in the sack at sunrise on the mark  
Now I want blood cause when I wake  
Again it starts
