

## Everyone Is Gay

### A Great Big World

If you're gay then you're gay  
Don't pretend that you're straight  
You can be who you are any day of the week  
You are unlike the others  
So strong and unique  
We're all with you

If you're straight well that's great  
You can help procreate  
And make gay little babies  
For the whole human race  
Make a world we can live in  
Where the one who you love's not an issue

'Cause we're all somewhere in the middle  
And we're all just looking for love to change the world  
What if the world stops spinning tomorrow?  
We can't keep running away from who we are

If you're gay then you're gay  
If you're straight well that's great  
If you fall in between that's the best way to be  
You've got so many options  
Every fish in the sea wants to kiss you

Awww...

'Cause we're all somewhere in the middle  
And we're all just looking for love to change the world  
What if the world stops spinning tomorrow?  
We can't keep running away from who we are

And we're all here in it together  
We're one step closer to breaking down the walls  
Everyone is gay
