

# Multiplies

## A Guy Called Gerald

You look at me but what do you see  
Who I am or who you'll have me be  
I don't know what else I can give  
Sometimes live and let live

Down the corridor  
You leave me wanting more  
Looking back I'm on my knees  
You never tease you just release  
And with these chains you set me free  
And with these chains you set me free

Everything about me multiplies  
The stars and the shadows in your eyes  
Ask you if you'll love me one more time  
You say I do love you love you

I tell myself I'll leave when I choose  
I ask myself I have a good snooze  
These questions never go away  
They burn like an eternal flame

Down the corridor said you wanted more  
Looking back I'm on my knees  
You never tease you just release  
With these chains you set me free  
And with these chains you set me free

Everything about me multiplies  
The stars and the shadows in your eyes  
Ask you if you'll love me one more time  
You say I do love you love you

And with these chains you set me free  
With these chains you set me free

And down the corridor
