You say you want some fun You're not the only one Not the only one

And you say you wanna run You're not the only one Not the only one

You will never get over me
I'll never got under you
Whenever our voices speak
It's never our minds that meet

You say you want some You're not the only one Not the only one

And you, you say you've come undone You're not the only one Not the only one

You will never get over me
I'll never got under you
Whenever our voices speak
It's never our minds that meet

You'll never get over me
