

# Don't Forget Me

## A Rocket to the Moon

Lock the door and meet me in here  
I'm not, I'm not scared  
Goodbye, say goodbye  
Fear well my one and only

We were meant for this  
And we were made for this  
We wont mess it up cause we always just fall down  
Well never miss another day cause were the ones who writes the songs  
And the writers lost his touch he doesnt't care for this at all

I wont stand for this  
I wont stand for this  
I wont stand for this  
I wont stand for this

So kiss me gently  
Cause I'll never let it go  
I bet you never thought that this was how the song goes  
And while your listening, I am really trying  
The words I never said will keep your eyes from crying  
(the words I never said will keep your eyes from crying)

I wont sit here waiting  
Would you stay for me?  
I can't wait forever  
Will you take that long?

This isn't what I'm waiting for  
This isn't what I'm here for  
This isn't what I'm waiting for  
This isn't what I'm here for

So kiss me gently  
I'll never let it go

So kiss me gently  
Cause I'll never let it go  
I bet you never thought that this was how the song goes  
And while your listening, I am really trying  
The words I never said will keep your eyes from crying

This is the way it was, the way it is, it should be  
We fell apart from one another like the movies  
So let's just live our lives and we can both be happy  
I wont forget you and I hope you wont forget me.

This is the way it was, the way it is, it should be  
I'll never let it go
