

# I'm Not Saying Goodbye

## A Rocket to the Moon

I've painted these walls a million times  
I drove so far to say these lines  
The only thing I wanted was with you

And I've packed my bags, yeah I'll be fine  
I've made some calls, I've said goodbye  
She'll see me in a couple days  
She'll wipe the smile off my face.

You're not looking yourself today,  
I can see it in the way that your hands shake  
And you know that you're no good for no one else but me love  
And you're trying not to act so cute  
With your hands in your pocket and one on your locket  
Show me something new

I'm writing down your favorite things  
To show you that I've read through your letter again  
As pages fall, my heart falls too  
You cross your t's and dot your I's  
I'm not saying goodbye

I've been sleeping with the lights on baby  
I know it drives you crazy, tonight I swear we'll be alone

But damn girl is it so obvious, that I'm out of luck and we're out of  
time  
So tonight you'll be all mine

I'm writing down your favorite things  
To show you that I've read through your letter again  
As pages fall, my heart falls too  
You cross your t's and dot your I's  
I'm not saying goodbye

I've been sleeping with the lights on  
I've been sleeping with the lights on  
I've been sleeping with the lights on baby  
I've been sleeping with the lights on baby  
I know it drives you crazy, tonight I swear we'll be alone

I'm writing down your favorite things  
To show you that I've read through your letter again  
As pages fall, my heart falls too  
You cross your t's and dot your I's  
I'm not saying goodbye
