

Black And Blue

A Skylit Drive

You found it all so hard
To spill your guts in this crowd
Just let it out!
We won't let you down in now
Any mind may seem not clear to you
Just hold on and we'll get you through

Reach out to me
Your identity can be what you want it to be
It's been too long
Since we've seen the sun
And we walk together with the black and blue on
We will carry on
We won't ever give up

If we could pick up the pieces that were all left behind
Memories re-align the reason
That the world is our mind
And it all became so clear in time
So I'll take what is mine

Reach out to me
Your identity can be what you want it to be
It's been too long
Since we've seen the sun
And we walk together with the black and blue on, black and blue
We will carry on
We won't ever give up

Reach out to me
Your identity can be what you want it to be
It's been too long
Since we've seen the sun
And we walk together with the black and blue on
We will carry on
We won't ever give up
