I Believed

Aaron Tippin

In a tiny town where the biggest things Were the water tower and a young boy's dreams I Believed In a little house of simple means Where doing without was a common scene I Believed On a dried up square of worthless Earth Where we scratched our living out of The Dirt I Believed In a little brown church where I first heard The choir sing and the preacher's word I Belived, oh I believed And the closer that I looked within The further I could see And I really didn't have much other choice So, I believed In a high-rise world of steel and glass Where a man dies young if he don't think fast I Believed On the streets where the truth is hard to find And what's in it for me is the bottom line I Believed In a place whre people don't seem to care They turn their backs like you're not there I Believed Yeah, where anything goes, it usually does I held my breath and bit my tongue And I believed, Oh I Believed In a higher place, in a deeper faith In a power stronger than you or me I Believed Now when they put that granite on my grave All I want that stone to say is I Believed

And where I'm from and the woman I love

The job I did and God Above I Believed, I Believed, I Believed

I Believed, I Believed, I Believed
