

# Loosen My Tie

Ab-Soul

Gimme mine, uh, gimme mine  
Gimme mine, uh, gimme mine  
Gimme mine, Gimme mine  
Uh, gimme mine, uh, gimme mine  
Gimme mine, bitch gimme mine  
Gimme mine, nigga gimme mine  
Gimme mine, gimme mine

But I...

Wish I could put the B.S. behind me  
And yes, I've been fresh, you need sterilizing  
And yes, I've been left, and you ain't invited  
Every time I'm arriving everybody excited  
Just witness the glitz and the glam of shining

Let me get it back from the top Ali

Life

I wonder will it take me underground like a runaway slave  
Where the hip hop radio don't play, what more can I say  
I need to get away from the lights...  
Flashing in my face like a topless model  
And the topless bottles keep popping like a Glock  
And it's coming non-stop, take a shot - don't worry about the price  
Everything is paid for, you fully accommodated  
When you bumping shoulders with the Grammy nominated  
Making American Pie, get you a slice  
It's the American Dream, right?  
So it seems I need to air out my self-esteem  
It's so high

But I...

Wish I could put the B.S. behind me  
And yes, I've been fresh, you need sterilizing  
And yes, I've been left, and you ain't invited  
Every time I'm arriving everybody excited  
Just witness the glitz and the glam of shining  
Can't tell who real or who lying  
(I may just) need to  
(Go on a hiatus) Yeahhh

Almost lost my life to the industry  
Better yet I did, I should bury me  
And I ain't even sell one record yet  
And she can see I'm hanging on barely  
And my bitch say I'm arrogant  
Cause when she with me I feel she should cherish it  
Only cause you never know when I'm a perish  
Not the clothing line but if the shit fit I wear it  
Stick to the script I will - Ferris  
Nobody ever said it'll be fair so  
When the tabloids read "Death To Ab-Soul"  
I couldn't get up, said I'll keep it on the down low  
You never know what's next, or know what to expect  
Still wanted for [?], but now I'm a prospect

From dusk until dawn, I feel like a object  
Under a telescope

But I...

Wish I could put the B.S. behind me  
And yes, I've been fresh, you need sterilizing  
And yes, I've been left, and you ain't invited  
Every time I'm arriving everybody excited  
Just witness the glitz and the glam of shining  
Can't tell who real or who lying  
(I may just) need to  
(Go on a hiatus) Yeahhh

I loosen my tie  
So I can drown in my drink  
I loosen my tie  
And give myself some space to breathe  
I see the skyline  
And the clouds are so at peace  
I need some my time (my time my time)

I need a Mai Tai  
So I can drown in my drink  
I loosen my tie  
And give myself some space to breathe  
I see the skyline  
And the clouds are so at peace  
I need some my time (my time my time)
