I wait for you, my love I ache for you, my love Call this a liquid love Rain down on me

You should have come over

Your love slips through my hands These streets like sinking sand Drowning in liquid love Rain down on me

I call out your name
(You should have come over)
Your love is chasing through my veins
(You should have come over)

Such a foolish game (You should have come over) Your love's no good for me, good for me But it makes me happy

Makes me happy

I wait for you, my love I ache for you, my love Call this a liquid love Rain down on me

I call out your name
(You should have come over)
Your love is chasing through my veins
(You should have come over)

Such a foolish game (You should have come over) Your love's no good for me, good for me But it makes me happy
