

## Thing Called Love

Above & Beyond

There was a time there was a place  
But there was fear inside  
A witty line to save my face  
A parachute of pride

To cross the line takes a tiny step  
But will the spark cause the bridge to burn?  
My fear entwined with my regret  
I beat a path for safe return

There's a thing called love that we all forget  
And it's a wasted love that we all regret  
You live your life just once  
So don't forget about a thing called love  
Don't forget  
Forget about a thing called love

So here we are, we're just the same  
And you will never know  
My secret plan  
How close we came  
To share another road

And have I lost my only chance  
To tell you how I feel inside?  
Is it just me I'd like to know  
Or are we all just a little blind?

There's a thing called love that we all forget  
And it's a wasted love that we all regret  
You live your life just once  
So don't forget about a thing called love  
Don't forget  
Forget about a thing called love
