

I Look Around

Abra Moore

I've tried my damndest to get near you
My ears are bleeding trying to hear you
I'm lost in the middle of a cold rain
And you're forests away

Every state I've ever been
Has greeted me with a bad beginning
I stand in the pathway of a fast train
To swing you my way

I look around and nobody's there
I look around and nobody cares
I look around and nobody's there

I try to keep myself contained
I watch TV ignore the pain
But every night like an army on a foray
My thoughts do invade

I look around and nobody's there
I look around and nobody cares
I look around and nobody's there

You don't believe that I've been through hell
Cause I'm pretty together and doing well
You don't believe that I feel alone
Cause the people that pass me say hello

I look around and nobody's there
I look around and nobody cares
I look around and nobody's there
