## **Demon's Night**

Sparks - the eyes of fire Flying high in the night Storms - the arms of evil It's gonna take your life

You know the bats crying Hell bent for the death Rain - the tears of the devil Gonna lay you to rest

Rolling a thunder - a curse on that night We've got your number - no use to hide

You - you've lost your freedom To the masters of force Ride on the waves of magic Dark nights will be your course

Rolling a thunder - a curse on that night We've got your number - no use to hide

Demon's night - no way out Demon's night - the angels fight Demon's night - cries of pain Demon's night Demon's night - a night to die

Lights - blinding your mind Like a flash out of hell Sounds - that no one will hear It's a demon's bell

Look in the face of horror It's a dangerous night Scream for your mother's children You've lost your human right

Rolling a thunder - a curse on that night We've got your number - no use to hide

Demon's night - no way out Demon's night - the angels fight Demon's night - cries of pain Demon's night Demon's night - a night to die

Rolling a thunder - a curse on that night We've got your number - no use to hide

Demon's night - no way out Demon's night - the angels fight Demon's night - cries of pain Demon's night

A night to die
