Know the bright lights of Hollywood Movie towns, a phony world Seen a few nights of wonder Seen a few nights of hell

Walking down the foggy streets of London town Now I know it well Every light in the world is nothing To the light we know so well

Starlight, shining bright Starlight, right

Had a bit of life in high society
The slums have seen me, too
And the rich and poor would wonder
At somethin' old and new

See it every night goin' slowly 'round Can't you see it's true Out there every man is equal Way out there in the blue

Starlight, shining bright Starlight

Take it all the way all night long Twinkle on, you stars I feel my brain is blinded I wonder what you are

Starlight, shining bright Starlight

Starlight
