

Cold and wired  
I've been fired  
Everything you said to me goes well  
Everything you said that you said  
Said you see right through me  
Could be pulling you to me  
Nothing seems to be working  
Throwing on my intentions on the, on the....

All tied in one  
Honesty waits here forever  
I've been undone  
Glory and us come together

Beautiful is my picture  
Throw it up in the spotlight  
This setting seems to be working  
Throwing all my intentions on the, on the...

All tied in one  
Honesty waits here forever  
I've been undone  
Glory and us come together

And I'll see this through  
Everything you said before  
And I'll see this through

All tied in one  
All tied in one

Everything changes the colours we see (All tied in one)  
Constant reminder of all that we should  
Taking it back (All tied in one)  
Turning around, turning around (Glory and us come to...)  
Everything changes the colours we see (All tied in one)  
Constant reminder of all that we should (Honesty waits here for ever)  
Turning around, turning around (I've been undone)  
Glory is waiting
