

# Into the Night

Ace Frehley

Two A.M. on a downtown street  
There on a corner two strangers meet, in the night  
And then until the daybreak  
They're gonna love and before and light,  
A heart may break, there in the night

Look in the alleys along the roads  
It's there the losers stand,  
There in the ring they bide their time  
Hustling what they can  
They beg just to get  
That bottle in their hand

There in the night  
Somewhere in the night  
Oh how they do what they do  
Just to get through  
There in the night... in the night

Then on the street in the heart of town  
A lady in black she turns around, in the night, yeah  
She stares at the man in the Cadillac  
He drives by but he'll be back... for the night  
There in the night

See the guy along the road  
Who can he be?  
Wait awhile he'll turn around  
See the man is me  
'Cause when I sing my dream...  
My dreams will set me free

There in the night  
Somewhere in the night  
Oh how they do what they do  
Just to get through  
There in the night... in the night

When the sun goes down  
And the light grows dim  
Slowly move in for the kill  
If you would come back again  
It would take away this pain  
But I don't know if you ever will

Love in the night  
Would feel so right  
So love me tonight... in the night

There in the night  
Somewhere in the night  
Oh how they do what they do  
Just to get through  
There in the night... in the night
