Remember Me

Ace Frehley

Well I'm staring down from Venus in the dead of night My mind is thinking back to when the world was right Your guns and bombs keep rolling off the aassembly line And people keep on starving and you think that's just fine

With my head in the clouds its easy to see You better live together peacefully You know the world is still your family tree So keep it straight - remember me It's not too late - remember me

Well I'm floating and spinning and flying above the Earth's atmosphere And I've got a few things to say That you may not wanna hear Now there's just enough time to repair it As long as you don't let it get you down But there's not a whole lot you can do for yourself when you're buried underground

With my head in the clouds its easy to see You better live together peacefully You know the world is still your family tree So keep it straight - remember me It's not too late - remember me

There's so much yelling an screaming and lying and cheating and robbing and preaching That we've heard it all We need some loving and caring And kissing and hugging And helping eachother Or we're gonna fall And that'll be all So remember me

With my head in the clouds its easy to see You better live together peacefully You know the world is still your family tree So keep it straight - remember me It's not too late - remember me
