

Slow Motion

Acid Black Cherry

On the sand with dainty steps just playing alone When I looked back, a faraway shadow was running on the water's edge

Suddenly, my back stiffened, and I ran innocently toward the premonition of love

Our meeting is in slow motion Enough as to invite slight vertigo in me Our meeting is in slow motion The person reflected in the depths of my eyes

The strides of your long legs slowly catching up to me You're whistling, a shepherd urging me to follow

A candidate for my summer lover, appearing so quickly...

Our meeting is in slow motion Only your heart is bold, I see Your love motion I can feel it in the words we share

Our meeting is in slow motion The affairs of passion are forgiving, you know Our meeting is in slow motion In the indulgent swiftness of our passion

On the sand with dainty steps...now I'm together with you
