## **Legend Has It**

## Acrophet

Voices in the darkness sound like our own
Under the skies of God I've watched the people grow
For seven days and nights I've traveled far and wide
I still can't find an answer but God knows how hard I've tried

What happened to the life I led so long ago What has become of me Some say I've trapped myself in this world Somehow legend has it

How long must we live in sin You've taken away our rights If you think the battle is over You'll never win the fight You'll never win

I think of all the times I could have changed my life But I was so unsure, unsure of my mind I think I figured it out, for too long I've been blind

What makes me feel this way

Legend has it
