

Welcome To The Big World

Adam Hood

You're in a tough place
With envy and hate
Where nothing stays the same
For any length of time

And you are so strong
But I know the days get so long
And just to pay right and wrong
Try to choose your side

Welcome to the big world
Welcome to your way
Where everybody said
No one said this was easy

And baby it's a big world
Revolution every day
You can't see what I can
The whole thing's in your head

All the teenage blue
Staring down at your shoes
We all have to learn to lose
Know how winning feels

But in the after math
There is a different path
Just make sure you know the math
Hands on the wheel

Welcome to the big world
Welcome to your way
Where everybody said
No one said this was easy

And baby it's a big world
Revolution every day
You can't see what I can
The whole thing's in your head

Welcome to the big world
Welcome to your age
Where everybody said
No one said this was easy

And baby it's a big world
Revolution every day
You can't see what I can
The whole thing's in your head
