

# Save Your Breath

Adore Delano

Seeing you at the villa  
Acting like nothing's out  
Absolute killers  
Running on broken trust  
Seeing right through me  
I'm looking through you, too  
You really knew me  
Now it's all done and through

You're losing oxygen  
And I can't find the words  
The air is getting thin  
Silence is all we heard  
You know our last goodbye  
Keeps playing through my mind like  
"Ah-ah-ah"

Love was already dead  
Love was already dead  
Love was already dead  
So save your breath  
Love was already dead  
Love was already dead  
Love was already dead  
So save your breath

When you think about me  
Do you remember when  
You were all about me  
Or am I just a myth?  
I loved you hardest  
Happy, just loving you  
And to be honest  
Sometimes I think I still do

You're losing oxygen  
And I can't find the words  
The air is getting thin  
Silence is all we heard  
You know our last goodbye  
Keeps playing through my mind like  
"Ah-ah-ah"

Love was already dead  
Love was already dead  
Love was already dead  
So save your breath  
Love was already dead  
Love was already dead  
Love was already dead  
So save your breath

Ooh, I'm coming up for air  
Ooh, I'm coming up for air

Love was already dead  
Love was already dead

Love was already dead  
So save your breath  
Love was already dead  
Love was already dead  
Love was already dead  
So save your breath  
So save your breath  
So save your breath  
Woah-oh-oh-oh-oh  
So save your breath  
Woah-oh-oh, now, n-now  
So save your breath  
Love was already dead  
Love was already dead  
Love was already dead  
So save your breath
