

# Big Blue Sun

Adrian Belew

When the summer clouds roll around the sky  
And a strand of stars sparkle in the night  
Let me take your worry from you  
Let me make a world around you  
Let me love you like nobody ever tried

When the lazy days come to lay around the lake  
And the rays of the sun run among the waves  
Don't you think about tomorrow  
Don't you drink a drop of sorrow  
Don't you look upon the past or wonder why

Let it roll down your shoulder  
Let it fall on the floor  
I'll be loving you like the water loves the shore  
Let it fall from your fingers  
Let it go, let it come  
I'll be loving you like the summer loves the big blue sun

When the summer clouds roll around  
The stars in the night  
And the lazy days lay around  
The morning light  
Let me take your worry from you  
Let me make a world around you  
Let me love you like nobody ever tried

let it roll down your shoulder  
Let it fall on the floor  
I'll be loving you like the water loves the shore  
Let it fall from your fingers  
Let it go, let it come  
I'll be loving you like the summer loves the big blue sun
