

# Brave New World

Adrian Belew

What a brave new world we live in  
What amazing changes we're seeing  
When science and man go hand in hand  
What a brave new world we live in

Sometimes i think of the advantages we have  
Over the people in the past  
There is no end to all the choices we can make  
And the miracles we use everyday

What a brave new world we live in  
What amazing changes we're seeing  
When science and man go hand in hand  
What a brave new world we live in

Sometimes we look at all the problems we face  
And we can only complain  
But look around at the advances we've made  
After all we used to live in a cave

What a brave new world we live in  
What amazing changes we're seeing  
We live in the sky and people can fly  
What amazing things we try

Technology is a double-edged sword  
Especially when it's used for the weapons of war  
But when you think about the progress we've made  
To cure a disease or travel into space  
Or simply pick up the phone and talk around the globe  
What amazing powers we hold

What a brave new world  
When science and man go hand in hand  
What a brave new world we live in
