

# When The War Comes

Aeon

You say that I am nothing  
With force you say that you will crush me  
I await our battle  
When that day comes I will be looking  
For you to kill

When the war comes crowned king I will be  
When the war comes I will slaughter the enemy  
When the war comes on the field you can't hide  
When the war comes you will die

You will bleed as I dominate  
I will drain you from all your blood  
If your words were just to scare me  
Then you are wrong they made me smell blood  
I will rip you apart

When the war comes crowned king I will be  
When the war comes I will slaughter the enemy  
When the war comes on the field you can't hide  
When the war comes you will die

Eye to eye we stand a close combat we will have  
You cannot win your defence I walk right through  
My attack did hurt you bad fighting for a final gasp  
Dead on the ground and I am marching on

You say that I am nothing  
With force you say that you will crush me  
I await our battle  
When that day comes I will be looking  
For you to kill

When the war comes crowned king I will be  
When the war comes I will slaughter the enemy  
When the war comes on the field you can't hide  
When the war comes you will die
