

You're the antibody  
I never thought I would make it  
With all these sores on my chest  
Despite my self-medication  
The plague was filling me in  
I asked the doctor if he could help me  
He leaned in closer said there was nothing  
Then you came over and you took disease away, away, away  
You're the antibody  
You're not like anybody  
Much more than just somebody  
When sickness takes my body  
You're the antibody  
I never thought I could carry  
(â?????Cuz I grew weaker with time)  
All of this weight on my back  
(I guess you never know)  
And I'll admit that it scared me  
(Oh yes I was terrified)  
So like a coward I ran  
(Just like I always do)  
I've got a feeling that there could be hope  
It's just so pretty when the cultures grow  
No need to worry when you've been exposed to me, to me, to me  
You're the antibody  
You're not like anybody  
Much more than just somebody  
When sickness takes my body  
You're the antibody  
Don't  
Waste  
The cure on me  
You're the antibody  
You're not like anybody  
Much more than just somebody  
When sickness takes my body  
You're the antibody  
You're the antibody
