

# I Know Your Little Secret

Afghan Whigs

He liked to kiss the boys  
He liked to kiss the girls  
He liked to kiss the in-betweeners  
Rub his tongue on their gums  
Rub his tongue on their gums

And lie with them  
And lied to them  
And light it up

I know your little secret  
I know your little secret

Watch my eyes  
They see what you don't see  
They see what you know  
And what you think I don't know

Ah, but now we both can share  
Everything we've ever done  
Everyone we've ever touched  
You liked the boys and girls

I know your little secret  
I know your little secret

All the lies  
All the hesitation  
Won't bring me closer now  
Won't you bring me close

I know your little secret  
I know your little secret  
I know your little secret  
I know your little secret
