Endlessly, She Said

Walked into our world and made horrible sounds. I can still hear them today (Strangely they seem) Beautiful now Though they outlast, my love

Still each time I always meant Every word, everyone Though in time they finally bent Every word, everyone, every word

"I will wait for you," she said, endlessly. "I will wait for you," so spoke, Misery

I returned to you but found My empty home The radio told me to stay I sang along You will outlast, my love

Still each time I always meant Every word, everyone Though in time they finally bent Every word, everyone, every word

"I will wait for you," she said, endlessly. "I will wait for you," so spoke, Misery (Oh)

I have been waiting for you Biting as you taught me to I have come to relieve you of life and love

I will wait for you I will wait for you I will wait for you I will wait I will wait

"I will wait for you," (I will wait) she said, endlessly. "I will wait for you," (I will wait) so spoke, Misery "I will wait for you," (wait for you) she said, endlessly. "I will wait for you," so spoke. So spoke, Misery.

I will bite straight through As I wait for you, dear Endlessly
