Energize Me

After Forever

Energize me with a simple touch Or with an open heart Energize me, fire up this flame That's burning between us

It's not a fantasy Another mystery It's just what I can feel And something I can see It's like a memory And in a melody It's just what we all know And we all hear

I was blind I was closed down Could not feel Or set it free

Energize me with a simple touch Or with an open heart Energize me, fire up this flame That's burning between us

It lies in everyone This swalling energy It's all around us too Electrifying you So can't you set it free? This virtue is the key Just something we all know And we are used

I can feel It's inside me Open up Enlighten me

Energize me with a simple touch Or with an open heart Energize me, fire up this flame That's burning between us

Energize me with a simple smile Open up your mind Energize me activate that light That's given and taken

Can you believe in the power that's burning between us? Would you believe if you open up your mind Open up your mind

Energize me with a simple touch Or with an open heart Energize me, fire up this flame That's burning between us Energize me with a simple smile Open up your mind Energize me, fire up this flame That's burning forever
