

# Gone Too Long

## After Midnight Project

Rescue me from a scene that bleeds  
confusion and lack of anything  
Keep telling me "One day They'll see"

It's 2 AM when I stare at the moon  
And I keep on thinking abouts your room  
And the look you gave me when I had to walk away

I strap on my shoes and I play the shows  
I smile and I smile 'til my cheeks get tired  
Then I walk outside, but there's no place to hide

I've been away for too long  
To notice when something wrong  
When somethings changing  
I've been away for too long  
To notice a change in her body  
A change and we kiss  
I've been gone

The ice and the snow  
The fire and the rain  
The sun and the beach  
It washes me away

I wish that time would take me back to you

When I get home will you know my face  
Will you love my smile, will you feel the same  
We'll just pick up where we left back in June  
I drink every night and sometimes I smite  
Take a pill to help me win the fight  
But I think of us when I stare into the sky

I've been away for too long  
To notice when something wrong  
When somethings changing  
I've been away for too long  
To notice a change in her body  
A change and we kiss

I can't figure out whats wrong  
I'm up and down  
I can't figure out whats wrong  
I'm up and down  
I'm up and down

I've been away for too long  
To notice when something wrong  
When somethings changing

I've been away for too long  
To notice when something wrong  
When somethings changing  
I've been away for too long  
To notice a change in her body  
A change and we kiss

I've been gone
