

## Something You Need

Against the Current

That night I still remember  
It was warm in the middle of summer  
Your voice like a lullaby, so low, so sweet  
Thought you had me but I'd never been so free

Now you're scared but you don't know why  
You keep running but there's nowhere to hide

You never thought I'd ever be  
Something you want, something you need  
Uh, oh, we got lost in the summer heat  
Now you just can't get over me

We'll spend the night watching movies in the dark  
You're playing bands I've never heard of  
And I know you tend to always overthink  
But tonight it's as simple as just kiss me

Now you're scared but you don't know why  
You keep running but there's nowhere to hide  
Scared to care because then you lose  
Try and hide how you feel but I feel it, too

You never thought I'd ever be  
Something you want, something you need  
Uh, oh, we got lost in the summer heat  
Now you just can't get over me

Take all of your doubts and throw them away  
We're falling tonight tell me that you'll stay  
You'll stay

You never thought I'd ever be  
Something you want, something you need  
Uh, oh, we got lost in the summer heat  
Now you just can't get over me

You never thought I'd ever be  
Something you want, something you need  
Uh, oh, we got lost in the summer heat  
Now you just can't get over me
