

## Voices

## Against the Current

My head chained down by voices  
Took us right where they want  
They're puttin' up choice as a poison  
Made them fall away just

"You know, they're better off without you"  
"You know how they talk about you"  
"Your fears are coming true, you know why"  
And I say

When will the voices stop making trouble inside  
If I look in the mirror will I see through their eyes  
When will the voices in my head just stop and let me rest  
I can't take it (take it)  
Hearing the voices again

I'm up to my neck in the noises  
So I thank God that walls don't talk  
I'd do anything to avoid 'em  
I tear 'em down 'cause I've had enough

"You know, they're better off without you"  
"You know how they talk about you"  
"Your fears are coming true, you know why"  
And I say

When will the voices stop making trouble inside  
If I look in the mirror will I see through their eyes  
When will the voices in my head just stop and let me rest  
I can't take it (take it)  
Hearing the voices again  
When will the voices stop making trouble inside  
If I look in the mirror will I see through their eyes  
When will the poison in my head just stop and let me rest  
I can't take it (take it)  
Hearing the voices again

"You know, they're better off without you"  
"You know how they talk about you"  
"Your fears are coming true, you know why"  
And I say  
Yeah, I know they're better off without me  
I know how they talk about me  
My fears are coming true  
I know why

When will the voices stop making trouble inside  
If I look in the mirror will I see through their eyes  
When will the voices in my head just stop and let me rest  
I can't take it (take it)  
Hearing the voices again  
When will the voices stop making trouble inside  
If I look in the mirror will I see through their eyes  
When will the voices in my head just stop and let me rest  
I can't take it (take it)  
Hearing the voices again
