Agathocles

State control - growing on
spying on you
and reading your e-mails too

All legal - just normal
big brother
breathing in your fucking neck

State is watching you
technology is their tool
following you
and you don't have a clue
all put in huge files
archives of our minds
freedom been denied
abolished human rights

For security of us fucking all?
state control, state control
reading our minds, reading our thoughts
state control, state control
