

# Human Bullet

Agent Steel

White light, mission classified  
Neural probe, map your mind target  
Run the maze, my loyal pet  
Recall your orders and the rest forget

(You are close)  
So close to the perfect crime  
A human bullet in a chambered mind  
An appetite for profanity  
Everything you were made to be

Fracturing the pristine mind  
Crack the shell and reach inside  
Manipulating all we find to do or die

Conflict borne of man machines  
Solidifies our chosen scheme  
It's so much more than what  
It seems behind your eyes

White light, falling star  
The you, you knew is now the slave you are  
(Dancing)  
To a dirge that sings within  
A waltz of damage just beneath the skin  
(Rhythmic death)

Death tapped out by your puppet toes  
Another current in the undertow  
Below the waves we weave the curse  
To drown the world and choke the earth

Assembling the fractured mind  
Puzzle equals suicide  
Create the killer from inside  
Some dreams must die

Slaughtering ability  
Bred in you through trickery  
Surrender blindly, slake our greed  
And stain the skies

(Dominate)  
Until we hear their cries  
(Dominate)  
While they believe our lies  
(Dominate)  
Salt and twist the knife  
(Dominate)  
Until the wound is ripe

Above theocracy, we reign  
Sharing death, bearing pain  
In God's name all the heretics must die

Behind democracy, we rule  
And communists we use as tools

All the world's devoted to our crime  
And still we trust our minds

We reign

Above theocracy, we reign  
Sharing death, bearing pain  
In God's name all the heretics must die

Behind democracy, we rule  
And communists we use as tools  
All the world's devoted to our crime

Behind theocracy, we reign  
Sharing death, bearing pain  
In God's name all the heretics must die

Above democracy, we rule  
And communists we use as tools  
All the world's devoted to our crime  
And still we trust our minds, we trust our minds
