

# Test Of Time

Agnostic Front

Don't live in the past  
There's so much that lies ahead  
It's moving so fast  
Don't fall behind or you will crash  
So live for today  
But learn from the past  
And cherish the moment  
Live life - live fast!

Tomorrow - will never be like yesterday  
Today - We stand the test of time

Into the future, the more and more we grow - The test of time  
This is not about yesterday, it's the ground that now you hold  
- The test of time  
Living in the past, you're gonna fall behind - The test of time  
We're moving forward, we won't get left behind - The test of time

So you're in denial  
You never cared so stop your lies  
And fuck what you done  
You lost the drive and your passion  
Still holding on  
You haven't done nothing since then  
You're not fooling no one  
Can't obtain what you begun

[Pre-chorus & Chorus]

The test of time (3x)
