What We're Gonna Be

Aiden Grimshaw

It's the fact that was real ill
And what we had was a real deal
You say that you don't wanna go back but I know in your heart that you still will
Warring caused the thunder
This bridge is broken there's water under it
It's crazy it's come to this you say no love lost but of course there's tons of it

My eyes are opening
Inside this broken thing
Heavy on me
Across my mind

I was thinking a break was for the best while living my life like a bachelor
Never realized that I caused a mess because the whole time acting up
You made a lasting impression feel like we're past the essence
Trying to get her back again I need closure to these unanswered questions

What we gonna be is this just a fantasy will we be together forever you're in my mind any weather
Is this now or for forever you hold my hand were together but we're separate this is love

Ignite the fire the fear and crash into the light
It hurts but it's worth it, it hurts but it's worth it
Ignite the fire the fear and dance into the light
It hurts but it's worth it, it hurts but it's worth it

My eyes are opening
Inside this broken thing
Heavy on me
Across my mind

What we gonna be is this just a fantasy will we be together forever you're in my mind any weather
Is this now or for forever you hold my hand were together but we're separate this is love

Ignite the fire the fear and crash into the light
It hurts but it's worth it, it hurts but it's worth it
Ignite the fire the fear and dance into the light
It hurts but it's worth it, it hurts but it's worth it

It is what it is but then it's not what it can be
I'm down on my knees and singing oh lord please
It is what it is but then it's not what it can be
I'm down on my knees

Ignite the fire the fear and crash into the light

It hurts but it's worth it, it hurts but it's worth it
Ignite the fire the fear and dance into the light
It hurts but it's worth it, it hurts but it's worth it

This time I'm frozen in exposed I'm caving in
