

Body Glove

Air Supply

The more you win, the more you gain
An open window to the human brain
The more you give, the more you lose
You can't go dancing in these mountain shoes
And that won't do.

The more you touch, the more you feel
It's just a picture that you thought was real
The less you need, the more you know
You can say the prophet told you so
Do do dooo

You and me, we've got enough
We live inside the body glove
You and me, we live for love
Deep inside the body glove
You and me, we've got enough
We live inside the body glove
You and Me, we live for love
Deep inside the body glove
The body glove.

The world is just potato chips
Joined together at the female hips
The Universe we left behind
We never know what we are going to find.
Do do dooo

And when we want to be alone
To get away, baby, to another zone
The word is out, the clothes are in
And who knows maybe it's another sin

You and me, we've got enough
We live inside the body glove
You and Me, we live for love
Deep inside the body glove
You and me, we've got enough
We live inside the body glove
You and Me, we live for love
Deep inside the body glove
The body glove
The body glove
The body glove

The more you win, the more you gain
An open window to the human brain
The more you touch, the more you feel
It's just a picture that you thought was real
You thought was real

You and me, we've got enough
We live inside the body glove
You and Me, we live for love
Deep inside the body glove
You and me, we've got enough
We live inside the body glove

You and Me, we live for love
Deep inside the body glove
The body glove
The body glove
The body glove
