

Dance With Me

Air Supply

Dance with me, let me put my arms around you.
Step into the sound, close your eyes, you will see.
Dance with me, I don't have an explanation.
I only want to feel part of you next to me.

I've thought about it for so long, that it could never be.
I run away from every song, and wait until the final one.
If you would only dance with me.

Let me pull your body closer,
Read your lips, speak your mind when you say,
Dance with me, don't wait until the music's over.
I don't want to watch as the night slips away.

I've thought about it for so long, that it could never be.
I run away from every song, and wait until the final one.
If you would only dance with me.

Dance with me.
Dance with me.

I'm standing here and I confess, the way you look inside that dress
Is bringing life onto this wooden floor.
For one last time the band will play and I am only steps away
From feeling like I've never felt before.

Dance with me, let me pull your body closer.
Let me read your lips speak your mind when you say
Dance with me, don't wait until the music's over
I don't want to watch as the night slips away.

I've thought about it for so long, that it could never be.
I run away from every song, and wait until the final one.
If you would only dance with me.

Dance with me, let me put my arms around you.
