

## Do It Again

Air Supply

I used to watch you walk away  
Till the road you take would bend  
I was the man to turn you on  
And you knew it after all  
Come tomorrow when I'm all weary  
You would turn me down again  
At least that's the way I can remember

Do it again, Do it again, Do it again  
Do it again, Do it again, Do it again

Every single word you told me got home  
I'm still thinking about them  
Every little secret we should have known  
And we can't live without them

You surely started something  
You surely gave me something new

Do it again, Do it again, Do it again  
Do it again, Do it again, Do it again

And I do think about you each now and then  
And each time it gets tighter  
From the road I can see the last break  
And my head's getting lighter

You surely started something  
You surely gave me something...you

Do it again, Do it again, Do it again  
Do it again, Do it again, Do it again

You surely started something  
You surely gave me something ...you

Do it again, Do it again, Do it again  
Do it again, Do it again, Do it again
