

# One Step Closer

**Air Supply**

I didn't really walk away I had something to explain  
Trying to reach you night and day when I did not know your name

Shall we promise just to talk and be alone, all alone

Why can't the voice that said hello at the moment of first sight

Whisper the words I need to know speak to me that way tonight  
Let me hear it travel through the restless sky straight from you

Come to me today

Chorus

One step closer forward motion

One step near our destination

How can I bring myself to sleep till I'm resting by your side  
Sharing the secrets hard to keep when you live them all through the night

And then wake up with the words I'll always want you to say

Come to me today

A lonely man has come undone

Is it wrong to think I understand where you are as close to me

Not much further to go

Let me hear it travel through the restless sky straight from you

Come to me today

A lonely man has come undone

Is it wrong to think I understand where you are as close to me

Not much further to go
