

The Scene

Air Supply

It's another lovely day
Are we still so far away
And how can I share it with you

It's not easy to believe
Are we both about to leave
Without ever saying, I do
I still love you

Just make me part of the scene
Say we're together, always forever
And everything else in between

Just say we're part of the scene
I don't want to hear it, I just couldn't bear it
If things weren't as good as they seem

You can say I'm not the one
That a lot of faith has gone
The bridges were never quite crossed

Every grain of truth, we deny or prove
Is somewhere before it gets lost
And is found again

Just make me part of the scene
Say we're together, always forever
And everything else in between

What if these feelings are all in my head
Flying around me in a world of their own
What if there's nothing that needs to be said

Just make me part of the scene
Say we're together, always forever
And everything else in between

Just say we're part of the scene
Say we're together, always forever
And everything else in between
Just say we're part of the scene
Just say we're part of the scene
Just say we're part of the scene
