

## The Scene

Air Supply

It's another lovely day  
Are we still so far away  
And how can I share it with you

It's not easy to believe  
Are we both about to leave  
Without ever saying, I do  
I still love you

Just make me part of the scene  
Say we're together, always forever  
And everything else in between

Just say we're part of the scene  
I don't want to hear it, I just couldn't bear it  
If things weren't as good as they seem

You can say I'm not the one  
That a lot of faith has gone  
The bridges were never quite crossed

Every grain of truth, we deny or prove  
Is somewhere before it gets lost  
And is found again

Just make me part of the scene  
Say we're together, always forever  
And everything else in between

What if these feelings are all in my head  
Flying around me in a world of their own  
What if there's nothing that needs to be said

Just make me part of the scene  
Say we're together, always forever  
And everything else in between

Just say we're part of the scene  
Say we're together, always forever  
And everything else in between  
Just say we're part of the scene  
Just say we're part of the scene  
Just say we're part of the scene
