

Empty Space

Air Traffic

It's a void that I can't fill
An empty space, I can't replace
With anything at all

The lights are all burnt out
And smoke will drive the swimmers down
There's no one left at all

You've done enough, he's still alive
He's breathing on his own
I leave everything I have

You've done enough, he's still alive
And he's breathing on his own
And he's breathing on his own

There's chaos everywhere
And panic written on the air
That everyone is breathing

And crushing light of day
The pain will never wash away
The fear will never leave

You've done enough, he's still alive
And he's breathing on his own
I leave everything I have

You've done enough, he's still alive
And he's breathing on his own
And he's breathing on his own

And God save our souls
How tables have turned and broke

One more like this could be the end
They say they told us all along
But we were busy getting laid

One more like this will be the end
And we've known it all along
We've known it all along
