

## You Make It Easy

Air

Never been here, how about you?  
You smile at my answer  
Given me the chance  
To be held and understood

You leave me laughing without crying  
There's no use denying  
For many times I've tried  
Love has never felt as good

Downtown or way up in the air  
When your heart's pounding  
You know that I'm aware

You make it easy to watch the world with love  
You make it easy to let the past be done  
You make it easy

How'd you do it, how'd you find me?  
How did I find you  
How can this be true  
To be held and understood?

Keep it coming, no one's running  
The lesson I'm learning  
Blessings are deserved  
By the trust that always could

Downtown or way up in the air  
When your heart's pounding  
You know that I'm aware

You make it easy to watch the world with love  
You make it easy to let the past be done  
You make it easy

You make it easy to watch the world with love  
You make it easy to let the past be done  
You make it easy  
So watch me fall in love
