

vampires

Airship

All my friends are vampires
They drain the life out of me
All my friends are barefaced liars
All lie through our teeth

I keep them all so close
Let them feed everyday
I could be so innovative
If only I could see

All my friends
It could be anybody
They're going to eat you alive
Heads down there's something knocking at my door
Heads down there's vampire at my door

All my friends are vampires
They drain the life out of me
