

# Teenage Wildlife

AJ McLean

She's gonna flash her eyes under moonlit skies  
He's gonna meet her there under the exit sign  
Yeah, they both look good, they need to be seen  
He's a James Dean rebel, she's a beauty queen  
Let's dance, let's dance

She wants to go all night, he wants to make no sense  
She wants to feel his kiss, it's so much better tensed  
She said "trip the lights", that's what she said  
And now she's in his head, she's in his head  
Let's dance and let the world fall apart

'Cause I need you tonight  
Just howl at the moonlight, I say it two times  
I love you, I love  
'Cause it feels like  
Savage that's civilized  
A teenage wildlife  
I love you, I love you

She says I get so bored living in this place  
We all need to go where the music plays  
All night, so let's dance  
He said this life's a cage, let's jump the fence  
All I want is you let's forget the rest  
Let's dance, and let the world fall apart

'Cause I need you tonight  
Just howl at the moonlight, I say it two times  
I love you, I love you  
'Cause it feels like  
Savage that's civilized  
A teenage wildlife  
I love you, I love you

All we fall from the sky when we hear the sound  
Go on for miles but won't hit the ground  
Don't be afraid they can't catch us now  
'Cause baby, we are teenage wildlife

'Cause I need you tonight  
Just howl at the moonlight, I say it two times  
I love you, I love you  
'Cause it feels like  
Savage that's civilized  
A teenage wildlife  
I love you, I love you

I love you, I love you  
I love you, I love you
